MS Industrie AG – MS Ultrasonic Technology Group presents new series machines

München, October 19th 2016. MS Industrie AG (WKN 585518; ISIN DE0005855183) announces that its daughter company MS Ultraschall Technologie GmbH (formerly part of MS Spaichingen GmbH) presents a new range of ultrasonic series machines at the K-trade fair, the biggest trade fair in the sector of plastics processing. The MS soniTOP machines of model variants Genesis, Fusion, Nexus and Opus can be employed – also through a flexible rental model – as table-top or stand mounted machines and can also be integrated into automated production lines performing the processes of welding, cutting and sealing. With the new machines, MS Ultrasonic Technology Group will set new market standards concerning precision, productivity and 4.0-connectivity, based on its well-known ultrasonic technology know-how. With the introduction of the standardized machines, MS Industry Group shall acquire a new range of customers in the field of high-precision production of small parts and assembly groups e.g. in the fields of electrical industry and medical technology.

Potential customers and interested shareholders can examine the new machines for the first time at the K-trade fair in Dusseldorf from 19th to 26th October 2016. For further information concerning the machines, please visit:
